SiteLine™ for Pre-Programmed BAS

Description

SiteLine™ for Pre-Programmed BAS allows building owners to manage their building's HVAC system from a central location and via the Cloud, providing reliable control for optimal comfort and efficiency. The operator can make schedule changes, adjust setpoints, manage alarms, collect trend information, or create custom control sequences for their HVAC equipment from the local touch-screen. Use the Cloud interface for comfort control to multiple sites using a standard web browser. The pre-programmed BAS is compatible with Daikin Applied BACnet® MS/TP HVAC units.

Features

- Automatic BACnet MS/TP integration
- Large color touch-screen display for easy access
- Linux OS
- Intuitive browser-based user interface
- Current status and setpoint access for all equipment
- Customizable control sequences and alarms
- Custom and graphical trend information
- Global actions
- Cloud access and storage
