Daikin Equipment

Chillers

Air-Cooled Chiller

Model: Air Cooled Scroll Compressor Chiller (AGZ-E)
Tonnage: 30 - 70
Description: Daikin AGZ-E air cooled scroll chillers are feature-rich, with industry leading performance, providing big benefits for small to mid-sized buildings.

- Reliable - AGZ-E is built on the solid foundation of reliability & robust design of Daikin's AGZ chiller product.
- Efficient - Exceeds ASHRAE Standard 90.1 2013 & FEMP 2012 standards.
- Quiet - Sound pressure ratings as low as 60 dBA.
- Low Cost of Ownership - AGZ-E's low installed cost, combined with high operating efficiency and ease of maintenance provide the lowest total cost of ownership.
- Ideal for Retrofit - Compact unit footprint can save installation space & costs.
- Mission Critical Applications - AGZ-E was designed to handle the requirements of data centers and hospitals. The RapidRestore™ feature along with the high evaporator leaving water temperature capability (65F) makes AGZ-E the ideal choice.
- Responsible Refrigerants - The AGZ-E chillers use R-410A, a no ozone depletion potential and no phase-out schedule.
- Our Open Choices™ feature allows the unit controls to easily integrate with your choice of BAS.
- LEED® Points: dual circuit models qualify for LEED EAC-4

- Model:** Magnitude Magnetic Bearing Water-Cooled Chiller (WME)
- Tonnage:** 100 - 1500
- Description:** The Daikin magnetic bearing compressor was developed to improve performance, reliability and reduce service requirements as compared with conventional centrifugal compressor designs. The magnetic bearing compressor has a single rotating component – the compressor shaft – levitated on a magnetic field.
- Magnetic bearing design eliminates mechanical seals, wear surfaces, gears and slide valves for longer machine life and increased reliability.
 - VFD designed as an integrated component with the compressor. Reduced in-rush.
 - Onboard digital controls continuously monitor operating status and provide fault protections.
 - Oil-free design eliminates oil management systems for improved compressor and system reliability. The oil-free design also eliminates the possibility of efficiency-robbing oil contamination of heat-transfer surfaces.

Model: Water-Cooled Screw Compressor Chiller (WGS)
Tonnage: 130 - 190
Description: Where noise is a concern, the Daikin water-cooled screw chillers provide the ideal solution for sound sensitive environments. Designed with a single main rotor compressor which is inherently quieter than twin screw compressor designs, these chillers provide some of the lowest sound levels in the industry. Their quiet performance can eliminate the need for expensive sound attenuation equipment. And their low first cost means facility owners save money right from the start.

- Wide operating map for applications ranging from comfort cooling to ice making
- Two refrigerant circuits improve part load efficiency
- Single main rotor compressor means inherently quieter operation than dual rotor compressors
- Compact size fits through a 3-foot door for lower installed costs
- Solid state starters are standard to provide controlled acceleration and deceleration with less compressor stress and vibration
- Controls flexibility—MicroTech® II controls with our Open Choices™ feature for easy integration with the building automation system of your choice
- R-134a refrigerant has no ozone depletion potential and no phase-out schedule

Commercial Rooftop Systems

Packaged Rooftop System

Model: **Maverick I Heating, Cooling & Heat Pump (MPS)**
Tonnage: 3 - 25
Description: Daikin Maverick™ I systems are ideal for one to three-story buildings including offices, schools, libraries combining low installation costs and interior space savings of a roof-mounted system with the operating and maintenance efficiencies of central heating/ cooling systems, designed with the latest features and benefits for today's market.

- Ideal for new, retrofit, or replacement applications on low rise buildings
- Lower installation costs and interior space savings
- Economizer with low-leak dampers for reduced energy costs
- Scroll compressors for efficient cooling operation and dependability
- Two-circuit refrigerant design for high reliability
- Easy access to mechanical components for reduced service costs
- Non-corrosive, double-sloped drain for good indoor air quality
- Totally enclosed condenser fan motors for reliable and quiet operation
- DDC controller with LonTalk® or BACnet® communication for easy integration into BAS

Model: Maverick II Heating and Cooling (MPS)
Tonnage: 15 - 75
Description: System performance and reliability make Daikin Maverick II commercial packaged rooftop systems the ideal solution for new, retrofit or replacement applications on one to three-story buildings like offices and schools, libraries. Arriving at your job site as a complete package, they combine the lower installation costs and interior space savings of a roof-mounted system with the operating and maintenance efficiencies of central heating and cooling systems.

- 100% dedicated outdoor air, VAV, or CAV operation
- Scroll compressors for outstanding capacity control
- Energy recovery wheel for increased capacity
- Double wall construction protects insulation
- Economizer operation with low leak dampers
- Efficient, quiet air foil fans
- Stainless steel drain pan for improved IAQ
- MicroTech® III controls with Open Choices™ for easy BAS integration
- Modulating hot gas reheat for superior dehumidification control
