

Rebel[®] & Rebel Applied[®] **Packaged Rooftop Systems**

ADVANCED TECHNOLOGIES **FOR SMARTER, MORE EFFICIENT HVAC**

Rebel (3-31 tons) and Rebel Applied (20-150 tons) rooftop systems feature heat pump technology, low-GWP R-32 refrigerant and inverter compressors to more efficiently provide heating during colder months and cooling during warmer months.

Eliminate unnecessary costs for separate heating and cooling HVAC systems with an all-encompassing, Rebel or Rebel Applied rooftop system that delivers superior efficiencies in both new construction and retrofit applications.
