EFFORTLESS INSIGHT & OPTIMAL PERFORMANCE

SiteLine™ Building Controls and Service Solutions for HVAC Equipment

Daikin makes building automation simpler, more effective and easier to scale than any other control solution on the market today.

Whether you're overseeing a complex HVAC ecosystem of equipment and buildings or monitoring standalone units, SiteLine Building Controls and Service Solutions will help you create comfortable and sustainable environments where tenants work and live.

Daikin's scalable, cloud-based building automation systems (BAS) instantly and easily optimize the performance of any HVAC ecosystem—including other makes and existing building systems. Plus, our real-time analytics provide effortless insight and enable optimization for energy, indoor air quality (IAQ) and sustainability.

ADD SITE LINE BUILDING CONTROLS TO YOUR HVAC EQUIPMENT

- ▶ Easy installation with out-of-the box functionality for both new and retrofit applications
- ▶ Simple operation that brings insight to system performance and is intuitive to manage
- ▶ Low upfront costs that enable you to work with other equipment systems
- ▶ Scalable solutions for both standalone equipment and building systems
- ▶ Advanced security that protects customer data

Stay connected with advanced analytics for equipment performance and energy management.

SITELINE™
DAIKIN BUILDING CONTROLS

APPLICATION

- ★ 24/7 monitoring and control for standalone equipment with a direct connection to hundreds of data points

OPERATIONAL ADVANTAGES

- ▶ Gives you the freedom and control to monitor and manage your HVAC equipment from any connected device, anywhere in the world
- ▶ Provides precise insights for easier decision making
- ▶ Helps maintain equipment with preventive alerts to reduce downtime and emergency service calls
- ▶ Offers remote access through PC, tablet or smartphone

SMART TECHNOLOGY

- ▶ Flexible design and automatic updates ensure your system stays current with the latest technology
- ▶ User-friendly interface makes it easy for any user to manage

Gain flexible control with simple building automation system applications using Daikin equipment.

APPLICATION

- ★ Pre-engineered, out-of-the-box system brings configurable system control without the need for custom programming

OPERATIONAL ADVANTAGES

- ▶ Optimizes HVAC performance and efficiency throughout your building
- ▶ Simplifies the complex and automatically pulls in different units; no need for expensive, on-site programming
- ▶ Greatly reduces upfront and long-term labor costs

SMART TECHNOLOGY

- ▶ Local and cloud-based control provides additional flexibility for remote configuration
- ▶ Simple, scalable and proactively equips you for future expansion
- ▶ User-friendly dashboards make it easy for connecting and controlling the building system
