

Your equipment can be upgraded and modernized throughout its lifecycle, giving you the opportunity to extend its overall life span. By choosing Daikin360 modernization services, you can trim energy use and save money, and improve the comfort and health of your building. We specialize in providing upgrades on a wide range of equipment and components from all brands to help give you the most efficient and technologically advanced systems. All services are performed by factory-trained technicians and single-sourced for your convenience.

OUR APPROACH

Our approach is simple. We'll work with your team to understand your needs and offer recommendations to transform the performance of your building. Once the work is complete, we'll be there to provide after-care support to ensure satisfaction. We also carry an extensive parts inventory backed by centralized distribution for expedited delivery. And, if your project requires that systems be shut down, we have temporary heating and cooling solutions to keep your building operational during the upgrade process.

- ▶ Refrigerants Conversions/Retrofits

TECHNOLOGY UPGRADES

We offer upgrade and retrofit services to replace outdated equipment and systems with the latest Daikin technology. Our technicians will help you extend the life of your HVAC equipment and our retrofitting services offer considerable savings compared to full equipment replacements.

ENERGY EFFICIENCY IMPROVEMENTS

Daikin services help increase energy efficiency, resulting in reduced utility costs and a smaller carbon footprint. We can evaluate and measure the impact of improvements, and you may also be eligible for utility rebates and incentives by upgrading to more energy-efficient systems.

ENHANCED OCCUPANT COMFORT

Our retrofitting services result in improved thermal comfort and a quieter environment. We prioritize IAQ, resulting in a more comfortable and healthier environment for you and your building's occupants while lowering maintenance costs.

FACTORY STARTUP & RE-COMMISSIONING

Daikin Applied factory-trained technicians help educate owners on the proper operation and care of their system during the start-up process. Our skilled technicians work on-site to perform system start-up or re-commissioning, using protocols that include measurement and verification checks after the equipment is running.
