

# DAIKIN APPLIED

## CENTRAL & WEST FLORIDA

## YOUR TRUSTED HVAC PARTNER

Daikin Applied Florida is your dedicated performance partner for the entire lifecycle of your building. With a strong local presence and the unparalleled global strength of Daikin, we empower Florida's buildings to achieve superior reliability, efficiency, and intelligence.

### AIR COOLED CHILLERS

Designed with scroll or screw compressor technology to meet specific capacity and efficiency needs for comfort and process cooling. Optional integrated controls and weather-resistant construction ensure reliable outdoor installation.

### ROOFTOP SYSTEMS FOR DEDICATED OUTDOOR AIR SYSTEMS (DOAS) APPLICATIONS

Engineered for superior dehumidification and optimal fresh air delivery, our specialized DOAS units are critical for maintaining comfort and indoor air quality in hot and humid climates. Their robust construction and optional advanced controls ensure reliable performance in demanding subtropical environments.

### VRV SOLUTIONS

VRV (Variable Refrigerant Volume) equipment and ductless mini-split systems. Available in air-cooled, heat recovery and heat pump systems.

### VENTILATION SOLUTIONS

Energy Recovery Ventilators (ERVs), fixed plate cores, heat recovery wheels.

This product line card represents our most common offering of commercial products.

## CENTRAL & WEST FLORIDA

### WORLD-CLASS HVAC SOLUTIONS — REGIONAL EXPERTISE

Daikin Applied Central & West Florida delivers specialized HVAC solutions meticulously engineered for the distinct climate and operational demands of the region. We partner with a select group of industry-leading manufacturers to provide specialized and high-quality HVAC solutions. Our partnerships allow us to offer a wide array of products, including innovative air management solutions, custom-engineered equipment, and advanced control systems. By collaborating with trusted manufacturers, we ensure our customers have access to the best technology and tailored solutions for their unique projects.

### MANUFACTURERS REPRESENTED

The leader in air filtration, AAF Flanders delivers a wide array of permanent and replaceable filters and related equipment for diverse applications.

Provides variable air volume controls and valves compatible with Daikin and integrable with third-party smart thermostats through Cloud API, Modbus, or BACnet.

Manufacturer specializing in high-quality corrosion protection for HVAC/R equipment, extending equipment lifespan and maintaining efficiency.

Manufacturer of a polymer membrane air-to-air total energy heat exchanger core, eliminating cross-contamination and the need for energy wheels.

A global leader in HVAC, with a range of energy-efficient heating, cooling, and ventilation solutions for residential, commercial, and industrial applications.

Manufacturer of customizable commercial HVAC airside solutions, including VAV terminals and air handling units for commercial buildings.

Manufacturer specializing in underfloor air distribution (UFAD) and variable air volume (VAV) systems, providing underfloor diffusers, fan terminals, and air tower AHUs.

Manufactures energy-efficient heating and cooling systems for residential and light commercial use, including furnaces, ACs, and heat pumps.

Manufacturer specializing in the design and manufacturing of precision cooling systems for critical electronic environments like data centers and labs.

Manufacturer of a complete line of residential and light commercial HVAC systems, including air conditioners, furnaces, and heat pumps.

Manufacturer of energy-efficient desiccant dehumidifiers with advanced silica gel rotors for precise humidity control in industrial and commercial environments.

Specializes in the design, manufacturing, and contracting of field-erected cooling towers for industrial and commercial applications.

# DAIKIN APPLIED CENTRAL & WEST FLORIDA

## COMPLETE CLIMATE CONTROL — FROM DESIGN TO DELIVERY

Daikin Applied Central & West Florida offers a comprehensive range of HVAC solutions to meet the diverse needs of commercial and industrial clients. Our solutions include energy-efficient systems for heating, cooling, and ventilation, tailored to optimize performance and sustainability. From advanced air handling units and chillers to specialized climate control systems, we provide the expertise to design and implement effective HVAC strategies.

### MANUFACTURERS REPRESENTED (CONTINUED)

Manufacturer of control systems and safety monitoring solutions including gas detection and ComfortMiser controls.

Specializes in custom-engineered electric heating and thermal management technologies including unit heaters, duct heaters, and immersion heaters.

Manufacturer of thru-the-wall PTAC and VTAC systems for replacement and new construction, along with water source heat pumps and fan coil units.

Manufactures a range of commercial and industrial chillers, heat pumps, and condensing units designed for efficiency and modularity.

Manufactures custom AHUs with thermal break design, offering energy recovery, welded stainless steel washdown systems, and high-performance components.

Manufacturer of heating, cooling, and ventilation for residential, commercial, and industrial applications including unit heaters, rooftops, AHUs, and chillers.

Manufacturer of DOAS units with high-efficiency energy recovery (ERV/HRV) and advanced filtration for commercial and multi-family building applications.

Manufacturer of BioPCM® and the ENRG Blanket™ for buildings to providing passive thermal management for enhanced energy efficiency and temperature control.

Modular ice thermal storage manufacturer for commercial and industrial HVAC, reducing energy costs through off-peak cooling and larger chillers.

Manufacturer of a wide range of FRP fans, AHUs, dampers, and louvers, providing custom-engineered solutions for corrosive commercial and industrial environments.

Powrmatic makes custom, high-capacity Air-Turnover Units for industrial spaces. They maximize energy efficiency and ensure even temperature control.

Manufacturer of modular ECM fan arrays for AHUs, featuring built-in redundancy, low vibration, and simplified installation for new and retrofit applications.

## CUSTOMER-FOCUSED COLLABORATION

Our team prioritizes building strong partnerships with our customers. We are committed to being a dependable partner, providing comprehensive support and service throughout the project lifecycle. Whether collaborating with consulting engineers, contractors, or owners, we focus on understanding their unique needs and delivering tailored solutions. Our goal is to simplify the process for our customers, offering seamless collaboration and mitigating project risks.

## MANUFACTURERS REPRESENTED (CONTINUED)

Manufactures fiberglass cooling towers, specializing in durable and corrosion-resistant fiberglass cooling towers for HVAC and industrial applications.

Specializes in building automation systems (BAS) and HVAC controls that optimize energy efficiency, comfort, and operation in commercial buildings.

Manufacturer of high-efficiency plate heat exchangers, offering customized designs optimizing energy transfer in district heating, chillers, and heat pump applications.

UV-C technology for air and surface disinfection, including V-PAC® purifiers and UV-C systems for HVAC coil and airstream disinfection applications.

Manufacturer of specialized air management solutions, including SEMCO's desiccant systems, energy recovery wheels, and chilled beams.

Swifter high-volume, low-velocity fans use variable speed, permanent magnet synchronous motors and aluminum blades to deliver sound below 40 dBA.

Manufacturer specializing in electric resistive heating elements and custom heating solutions for a wide range of industrial applications.

Manufacturer of comprehensive solutions for HVAC vibration isolation, seismic control, and noise control (BRD), along with roof curbs and bases (CanFab).
